Electrical World

A Review of Current Progress in Electricity
and Its Practical Applications

Volume LXVI

July 3 to December 25, 1915

McGRAW PUBLISHING COMPANY, Inc.
239 West 39th St.
NEW YORK CITY

INDEX TO VOLUME LXVI

GENERAL INDEX

Entries from the Digest of Current Electrical Literature are indicated by D (Digest)

A

Accident prevention:
——Arc lamp trimmer's danger signal, *644
——Danger points, Emphasizing, *1093
——Duties of operating engineer, *589
——Protective equipment for linemen using telephones, *812
——Safety and rescue work, Training employees for, *716
——Safety code conference, 736, 794, 846, 956, 1014; Comment, 1009
——Safety-code, Co-operation on, 841
——"Safety first" competition among street railway employees of Pensacola (Fla.), Elec. Co., 367
——Safety results in Louisville, 105
——Safety rules considered by Wisconsin, 959
Accounting:
——Contractors cost keeping and bookkeeping. By Louis W. Moxey, Jr., *1153
——Contractors cost keeping, Labor and overhead expenses, 818
——Contractors shop costs and profits. By Louis W. Moxey, Jr., *870
——Depreciation accounts. By Holbert P. Gillette, 124
——Depreciation in public utilities, 743
——For small properties, 58
——Overhead costs, appraisal of. By Halbert P. Gillette, 41
Advertising: (See also Central station business and displays)
——Campaign of Louisville (Ky.) Gas & Elec. Co., *305
——Car windows, 478
——Home trade, encouraging, *1037
——Fourth of July advertising in N. Y., *107
——Interesting the non-electrical public, *1184; Comment, 1177
——Light as an advertising medium, 335
——Newspaper publicity at electrical conventions, 395
——Pageant at Chicago, Electricity in advertising, *38
——Picture post cards, *868
——Posters for stimulating the use of electric service, *1419
——"Sticker" which sold 160 irons, *929
——Telling phrases in appliance advertising, *372
——Wall sign showing equipment for various rooms, *758
Aero-torpedo controlled by radio impulses, 333
Air:
——Electric strength of. By Prof. J. B. Whitehead, 6
Air brush. Paasche Air Brush Co., *1050
Alabama Light & Traction Association, Convention, 1112
Alpha rays in hydrogen. By J. C. McLennan and H. V. Mercer, (D.) 1438
Alternating current:
——Harmonics, Determination of, (D.) *543
——Non-sinusoidal waves, Analytical and graphical Solution. By F. M. Mizushi, *8
Aluminum:
——Alloys. By Ernest Wilson, (D.) 820
American Association of Engineers, Convention, discusses means of improving the status of the engineer, 1391
American Electric Railway Association, 791
American Electrochemical Society:
——Joint meeting with I. E. S., New York, 1000
American Institute of Electrical Engineers:
——A. I. E. E. day at Exposition, 679
——Annual convention, 6, 62
——Boston branch meeting, 904
——Boston section, 1226
——Coming conventions, 1450
——Committee appointments, 397
——Directors' meeting, 849
——Indianapolis-Lafayette section, 1338
——Los Angeles section, 1281
——Lynn section, 944, 1226, 1450
——Panama-Pacific convention, *677
——Philadelphia meeting, 848
——Pittsburgh section, 776, 887, 1226, 1450
——Pittsfield section, 1168, 1226
——Portland section joint meeting with N. E. L. A., 1224
——Relation of local sections to parent body, 57
——Rochester meeting, 776, 1112
——Schenectady section meeting, 887
——Spokane section, 1112
——St. Louis meeting, 901
——Standardization rules, 315, 331
American Manufacturers' Export Association, Convention, 998
American Physical Society, Program, 1016
American Society of Mechanical Engineers, Annual meeting, *1299
American Wood Preservers' Association, Announcement, 1450
Antennas (See Radiotelegraphy)
Antimony refining. By Anson G. Betts, (D.) 1158
Appliances, Cost of using, 980
Arc:
——Electrode's consumption prevented by vapors at reduced pressures. By W. A. Darrah, (D.) *1099
——Unstable states in arc and glow. By W. G. Cady, (D.) *1156
Arcing at contacts prevented by tungsten-lamp shunt, *1435
Arc lamps:
——Arc lamps vs. Half-watt tungsten lamps. By A. Chevalier, (D.) 74
——Globes, Rotary brush for cleaning, *597
——Luminous, with refractor, General Electric Co., *152
Arc welder, Lincoln Electric Co., *373
Armature:
——Copper and tooth eddy-current losses at no load. By A. Press, (D.) 708
——Flux distribution around d. c. type. By Bernard Hague and Francis F. H. Schroeder, (D.) 985
——Reaction. By A. Blondel, (D.) 651
——Repairing with help of a crane, 866
——Winding, direct-current. By F. Leyerer, (D.) 1210
——Winding, Electric, (D.) 876
Associated Manufacturers of Electrical Supplies:
——Activities of and formation of subcommittees, 906, 1447
——Board of governors meeting, 741
——Lamp receptacle and socket section formed, 238
——Section meeting announcements, 1337
——Snap and switch sections formed, 1053
Association of Austrian and Hungarian central stations, (D.) 1326
Association of Edison Companies:
——Convention, *622
Association of Edison Illuminating Engineers, Convention, 377
Association of Iron and Steel Electrical Engineers:
——Convention, 624
Associations, Nationalizing the work of, 953

B

Batteries:
——Alternating-current systems, Use in, 394, (D.) *465, (D.) 1157. By J. A. Walton, *975
——Charging, Mechanism to control. By Paul Capraro, *1317
——Charging methods employed in New York garage, *1145
——Charging outfit for automobile ignition and lighting batteries, Ft. Wayne Elec. Works of G. E. Co., *422
——Charging panel for small batteries, Home-made, 591
——Charging sets, Robbins & Meyers Co., *485
——Christmas-tree lighting, storage type. General Lead Batteries Co., *1222
——Dry cells, (D.) 251
——End-cell switch made of knife-blade switches, *109
——Energy, Saving when vehicles enter garage, *648
——Porosity, Effect on output. By C. Heim, (D.) 600
——Nickel-iron-alkaline, High discharge rate. Edison Storage Battery Co., *1103
——Rental with low-priced vehicle, 717
——Supports for storage cells, *1316
——Three-volt dry battery. Usona Mfg. Co., *1051
——Storage type, Size and shape of dry cells, J. P. Mentzer & Company, *1443
——Storage type, Transferring electrolyte without waste, *367
——Two-cell, three-volt, Interstate Electric Novelty Company, *1444
——Weston cell, (D.) 652
Bearings, Friction load of line-shaft type, *809
——Theory of oil action in, (D.) 1437
Bells:
——Telephone, (D.) *21
Belt, on short pulley centers, *26
Blower:
——Mechanical orchestra type, Motor-driven, Kinetic Engineering Company, *1443
——Motor-operated centrifugal blower, overloading tendency, 534
——With air heater, B. F. Sturtevant Co., *1274
Blueprint washer, *1092
Boilers:
——Blow-off water, Cooling before discharging into sewer. By T. W. Reynolds, *592
——Chain grates, Operating, 353
——Chain screen for furnace doors, E. J. Codd Co., *937
——Code, A. S. M. E., Allied interests seeking legislation to standardize, 267
——Code committee reports favorable progress, 794
——Coke, burning on flat grate, 750
——Compound injector. By T. W. Reynolds, *813
——Efficiencies, Comparative. By R. J. Weitlauer, (D.) 19
——Equipped to handle summer and winter loads, *1082
——Explosions, Comment, 80
——Explosions, Causes of, 255
——Explosion-proof for mines. By H. H. Clark, (D.) 54
——Feedwater, Construction and performance of treating apparatus. By H. G. D. Nutting, *1256
——Feedwater lines, Sectionalizing when operating economizers in parellel, 591
——Firebrick, Characteristics of. By E. H. Tenney, *1086; Comment, 1067
——Furnace and boiler economy. By A. L. Wescott, *583
——Furnace maintenance cost, Reducing. By Charles M. Crewe, *1433
——Grates, Simple changes to reduce repair expense, 1148
——Rating, Operating Above, 899
——Repaired by electric weld. By A. C. Lasher, 1207
——Return of heating system condensation to boilers, 367
——Scale prevention, 79, 256, 1236, 1375
——Settings, Inexpensive way of stopping leaks. By J. R. Cravath, 1029
——Settings, Precedents and new conditions, 395
——Stoker, Automatic chain grate type. No-smoke Stoker Co., *1106
——Stoker-drive, modification which increases reliability, *1434
——Stoker, Traveling-grate. Keystone Stoker Co., *487
——Valve requirements of. By T. W. Reynolds, *976
Boiler room:
——Air supply required; Comment, 1066
——Ash-removal system, Vacuum type. By T. W. Reynolds, *1371
——Automatic devices and operators with common sense; Comment, 675
——Bonus system, 443
——Draft, How individual control proved advantageous, 1260
——Economy, 1242
——Safety-valve protection in a Massachusetts steam plant, *141
——Timing device regulates work of firemen, 1225
Bolts, expansion type. Parker Supply Co., *264
Book reviews:
——Alternating Current Electricity and Its Application to Industry. First course. By W. H. Timbie and H. H. Higbie, 300
——Alternating-Current Problems, Underlying Theory. By F. E. Austin, 936
——Alternating-Current Work. By W. Perren Maycock, 821
——Anlage und Betrieb Kleinerer Elektricitätswerke, Insbesondere mit Ausmitzung Vorhänderer Wasserkraft. By S. Herzog, 22
——Annuaire Francais de l'Electricité, 140
——Automatic Telephony. By Arthur Bessey Smith, 252
——Calcul des Lignes Aériennes à Point de Vue Méchanique, Par des Abaques. By Andre Blondel, 466
——Catalogue of Technical Periodicals. Compiled by Alice Jane Gates, 710
——Centrifugal Pumps. By R. L. Daugherty, 78
——Combustion and Smokeless Furnaces. By Joseph W. Hays, 936
——Conservation of Water by Storage. By George F. Swain, 412
——Consumers' Accounts and Meter Department Routine. By A. C. Glover, 140

*Indicates illustrated articles.

291712

Book Reviews: (Continued)
——Deutscher Kalender für Electrotechniker, 1915. By G. Dettmar, 22
——Dielectric Phenomena in High-Voltage Engineering. By F. W. Peek, Jr., 542
——Directions for Designing, Making and Operating High-Pressure Transformers. By Prof. F. E. Austin, 140
——District Heating. By S. Morgan Bushnell and Fred B. Orr, 78
——Drake's Telephone Handbook. By David Penn Moreton, 22
——Dynamometers. By Rev. Frederick John Jervis-Smith, 352
——The Electric Railway. By A. Morris Buck, 988
——Electrical Instruments in Theory and Practice. By W. H. F. Murdock and W. A. Oschwald, 188
——Electricity for the Farm. By Frederick Irving Anderson, 188
——Elektrische Kraftübertrugung. By Paul Köhn, 22
——Elektrochemie Wässerige Lösungen. By Dr. Fritz Foerster, 301
——Elementary Mechanics for the Practical Engineer. By John Paul Kottcamp, 352
——Engineering Economics. By John Charles Lounsbury, 23
——Handbook of Mathematics for Engineer. By L. A. Waterbury, 821
——How to Make a Transformer for Low Pressures. By Prof. F. E. Austin, 140
——Internal-Combustion Engines. By Robert L. Streeter, 877
——Jahrbuch der Electrotechnik für 1913. By Karl Strecker, 140
——The Law of Electricity. By Arthur F. Curtis, 188
——Mechanical Drawing for Colleges and Universities. By James D. Phillips and Herbert D. Orth, 1211
——Modern illuminants and Illuminating Engineering. By Leon Gaster and J. S. Dow, 412
——Official Report of the Second National Foreign Trade Convention, 188
——Physik. Edited by E. Warburg, 877
——Plane Geometry. By Claude Irwin Palmer and Daniel Pomeroy Taylor, 765
——Polyphase Currents. By Alfred Still, 22
——Practical Applied Mathematics. By Jos. W. L. Hale, 78
——Practical Mechanics and Allied Subjects. By Joseph W. L. Hale, 710
——Principles and Practice of Electrical Engineering. By Alexander Gray, 22
——Proceedings of Association of Iron and Steel Electrical Engineers, 1914, 140
——Public Utilities: Their Fair Present Value and Return. By Hammond V. Hayes, 188
——Public-Utility Economics, Summary of lectures presented at West Side Y. M. C. A., New York, 140
——Purchasing. By C. S. Kindfoos, 466
——Repetorium der Physik. By Rudolf H. Weber and Richard Gans, 188
——Schöpfungen der Ingenieurtechnik der Neuzeit. By Max Geitel, 22
——Specification and Design of Dynamo-Electric Machinery. By Miles Walker, 1158
——Standard Handbook for Electrical Engineers. By Frank F. Fowle, 653
——Steam-Boiler Economy. By William Kent, 988
——Test Methods for Steam Power Plants. By Edward H. Tenney, 1043
——Theorie der Elektrizität. By Dr. M. Abraham, 466
——Thomas' Register of American Manufacturers and First Hands in All Lines, 1211
——The Year Book of Wireless Telegraphy and Telephony. By Marconi Publishing Corp., 765
——Wireless Telegraph. By Dr. J. Zenneck, 1270
——Wireless Telegraphy. By A. B. Rolfe-Martin, B. Sc., 23
Brick factory (See Industrial plants)
Bridge turning, Energy required for, *867
British Municipal Electrical Association, Report of convention, (D.) 139, (D.) 300
British National Physical Laboratory, annual report, (D.) 412
Brush contact, Troubles attributable to. By E. C. Parham, 813
Brushes:
——Commutation trouble traced to poor brushes. By E. C. Parham, 1258
Building Data League, organization of, 39
Bullet locater, (D.) 821
Bureau of Standards:
——Appropriations asked for, 1298
——Organization, Work and relation to industries. By Frederic Nicholas, *1244, *1359
——Outline of its work, *527
——Relation to industries, 1236
Bushings for busbars, *1205
Business conditions (See also foreign trade and Federal Trade Commission and Statistics)
——American business units, State of, 1241
——Central-station business, Stability in. By Frederic Nicholas, *572
——Copper market and outlook for future, *1017
——Economic conditions due to war, 1124
——Electrical industry, Situation in, 1403
Business Conditions: (Continued)
——German electrical industry. By C. Heiss, (D.) 599
——Germany, Substitutes for copper, (D.) 1040
——Opportunity, The engineer's; Comment, 1010
——Platinum, Scarcity of, caused by European embargo act, 1166
——Post-war trade problems, 997
——Problems caused by war, 898
——Problems of electrical industry, 505
——Railway and lighting business, Status of, 1242
——Resolutions for new year, Industrial, 1291
——Right to choose customers upheld, 1123
——Trade conditions, 718
——Vehicle market widening, 1336

C

Cables (See Wire, wiring and conduit)
Calculating device for engineers, Computer Mfg. Co., *604
Canadian Electrical Association, Meeting at Ottawa, 37
Capacity, Calculation and measurement. By J. Sumec, (D.) 600
Carbon:
——As a heating element in appliances. By C. W. Piper, *134
——Vaporization of. By O. Lummer (D.), 298
Central stations: (See also Hydroelectric developments)
——Bay State Street Railway, Construction costs for 10,000-kw. steam plant, 1312; Comment, 1292
——Birmingham (Eng.) corporation (D.), 351
——British central stations (D.), 350
——British electricity supply, Effect of war, (D.) 986
——British gas-power plant, (D.) 20
——British power supply in war time, (D.) 138
——British supply station, (D.) 1041
——Buffalo companies, Merger authorized, 37
——Chicago central-station situation, Review of, 737
——Commonwealth Edison building opening, 817
——Commonwealth Edison Co. opens new headquarters, *682
——Condensing plant. By G. Klingenberg, (D.) 19
——Denmark, Supply of electricity to, (D.) 1101
——Design of steam-electric stations, Considerations involved, *690
——Detroit Edison Co., Connert Creek station, *725
——Eastern Michigan Edison Company, Barton station, one of four hydroelectric plants on same river and connected with Delray and Conners Creek steam stations of Detroit Edison Company. By Ray K. Holland, *1410; Comment, 1405
——Georgia-Carolina Power Co., Stevens Creek plant, including outdoor substations, *1132, *1189; Comment, 1178
——Georgia Ry. & Pwr. Co., Tallulah Falls plant, Construction costs, *916
——Germany:
Government regulation possible after war. By G. Siegel, (D.) 1268
Question of government operation. By G. Siegel, (D.) 935
Saarlouis-Merzig transmission and distribution plant. By Wilhelm Gosebruch, (D.) 1326
Employees, Number in Germany's electricity supply. By F. Fasolt, (D.) 876
——India central station systems, (D.) 542, 77
——Indiana electric properties, Merger of, 1407
——Japan, Katsuragawa Hydroelectric Co. By C. Tsukamoto, *910
——Louisiana oil-engine plant, Operating conditions, 1432
——Montana Power Company announces completion of Volta plant, 1393
——Moscow, Russia, Central station system, Kirpitchnikov, 599
——Netherlands, Scheme for for systematic electrical supply. By Verhagen, (D.) 599
——Norwegian water-power plant. By J. Reyval, (D.) 1438
——Outlet for line and inspection platform, *534
——Out-of-doors generating station, Suggested design, *689; Comment, 674
——Petrograd, Developments in. By J. Vichniak, (D.) 936
——Philadelphia Electric Co., New Christian St. station, nearing completion, *780
——Public-Service Electric Co. of New Jersey, Essex plant, Construction record, *1286
——Russian electricity works, Statistical data, (D.) 1382
——Shanghai electricity works, (D.) 1326
——Springfield (Ohio) Ry. Co., Building a power station upon one in service, *965
——South African plant. By R. Trunbull Mawdesley, (D.) 709
——Texas properties damaged by flood and hurricane, 444
——Virginia Power Co., *239, *286; Comment, 234
Central station business (See also Advertising, contracts, contractors and jobbers and displays)
——Acquaintances with business men, Forming, 929
Central station business: (Continued)
——Adapting sales plan to a nationality, *540
——Advising public of electric-service problems, *1202
——Apartment, Model electrical, *207
——Appliance demonstration, *98
——Appliances, Extend field for, 107
——Appliances, Keeping in service, 792
——"Baby bond" that guarantees paid bills. By George B. Saunders, *1034
——Bank deposits encouraged among employees, 1038
——Bargain house-wiring offers at Sandusky, O., 420
——Bean-guessing contest that won much new business, *30
——Best asset sound public policy, 329
——Better business from late sign hours, 938
——Bettering relations with contractors, Policies for, 1098
——Billing consumers by post card, 1167
——Billing gas and electricity accounts on same bill, 369
——Booster meeting of United Electric Light & Power Co., 998
——British electricity supply, Effect of war, (D.) 986
——British, Operating conditions and energy cost for Bury-Heywood system, (D.) 1268
——Census of consumers, 1123
——Charity, Minimizing expense of donations, 1194
——Christmas candles in windows, Reviving old custom, *1324
——Civic responsibility, Rewards of taking, 785
——Competition in small-city public-utility operation. By B. A. Brackenburg, 4
——Collecting bills, Gentle art of, 149
——Collections interfere with salesmen's efforts, 984
——Collection of money by salesmen, Opinions on. By Earl E. Whitehorne, *921
——Collection, Should the salesman perform this duty, 193
——Contracts, Informing employees of new ones, *372
——Controversy over service in Pasadena, Cal., 492
——Co-operation between contractor and central station, 32
——Co-operation between electrical contractors and Little Rock (Ark.) Ry. & Elec. Co., 481
——Co-operation with builders, *419
——Co-operation with jobbers on Pacific coast, 1224
——Cost of electric service for a town of 750. By J. D. Bowles, 254
——Cost of operating appliances, Information for consumers, 980
——Dayton (O.) Power & Light Co., *645; Comment, 617
——Developing local industries as future loads, 480
——Discounts during Christmas campaign, 1266
——Distributing fans in "Movies" to advertise electric appliances, *371
——Explosion affords opportunity for motor-service contract, *928
——Familiarity with the local system, An asset to salesmen, 1011
——Flatiron campaign, United Electric Light & Power Co., *307
——Flatirons, Old for new, *475
——Forestalling trouble by inspecting fuses on delivery of appliances, 703
——Fourth-of-July celebration that sold twelve ranges, *260
——Gas-heated boiler helps secure motor service in plating plant. By F. B. Steels, *1380
——Gratuitous service, Helping the customer remember, 1198
——Hoist rented to contractors in Worcester, Mass., *596
——House-wiring campaign, Lynn, Mass., *539
——House-wiring campaign shows immediate profit, *1195
——House-wiring requests increased by giving appliances for sales hints, 1150
——House wiring, Seasonable market for, *538
——Human element in sales work. By William Gould, *536
——Illumination loads during conventions, Securing, *817
——Index to ledger index, used by Consolidated Gas. Elec. Light & Power Co. of Baltimore, Md., *98
——Industrial loads, Why central-stations do not get all large ones, 759
——Industrial-service contracts, Securing with trial motor installations, *1430
——Isolated plant for office building, Curves showing fallacy of, *1423
——Italy, Market for electrical energy. By G. Semenza, (D.) 410
——Lamp renewal policy of Edison companies, 1303
——Lamp voltage, Advising customers of correct value, *596
——Leasing motors, Results of, 1150
——Lecture course on electric appliances, New York Edison Company, *1380
——Letters commending service, Displaying, 1202
——Letters ending "Electrically Yours," 868
——Load, New sources of, 731
——Market prices and investment costs, 1403
——Meter-record forms, *255
——Minimum monthly bills, Salesman's ideas, *147

*Indicates illustrated articles.

Central station business: (Continued)
——Motor-service data at a glance, *370
——Motor-service problems and customers' viewpoint, *680
——"Moving-day" advertisement, *649
——Municipal loads, Chart for attracting, *1035
——Office for small central station, how it was made a valuable investment. By John T. Kester, *1424
——"Old-business department," 595
——One-day sale of electric irons, *200
——Outlining building with lamps, To set merchants example, *1266
——Pacific Gas & Electric report, 427
——Planning for factory substation, 563
——Popularizing baking and cooking, *707
——Popularizing electric service by easy-payments on appliances, 1011
——Postage on electric service bills, Saving, *420
——Premium plan that wired 250 houses, *417
——Price maintenance on electrical merchandise, 193
——Provincetown, Mass., 596
——Railway-energy contract in California, 104
——Range-campaign opened by Southern California Edison Co., *1096
——Range load, Effect on total, *646
——Range load, Investment required to serve, 706
——Recording unexpected losses, 1403
——Relations, Central station man in the community, 282
——Resale of energy by customer, 705
——Residence non-lighting load increased by use of appliances, 980
——Resumption of sale of appliances by Rochester (N. Y.) Ry. & Light Co., Successful, *257
——Rural service, Selling, *307
——Salesmen's reports, Minimizing time required for, 1202
——Sales records conveniently displayed, *31
——Sales talent, "Tip" cards aid in finding, *1202
——Service code to guide central-station employees, 1263
——Service panels installed by Louisville (Ky.) Gas & Electric Co. for $2.99, *648
——Soliciting, Using school boys to ferret out appliance "prospects," *95
——Stability in the central-station industry. By Frederic Nicholas, *572
——Stereoscope an aid to electrical salesman, Cortescope Co., *485
——Stock-room leakage, The cost of and who should pay. By G. D. Crain, Jr., *1422
——Summer resorts, Day-service at, 442
——Sunshine chart distributed by Niagara Falls central station, *597
——Town pride in electric service. By E. Burt Fenton, 757
——Training men for the central station industry, *962, *1142
——Trusting, How far to go, 1067
——Vacuum cleaners introduced by renting and presenting one free, 761
——Water heater that keeps service bills down, 259
——Wiring campaign in a small city, *145
——Yachts receive central-station energy, *758
Central station operation:
——Air washer at the Gold St. station of Edison Elec. Illg. Co. of Brooklyn, *92
——Arrangement of plant, Convenience in, 1179
——Battery reserve in an alternating current system, 394, (D.) *465, (D.) 1157. By J. A. Walton, *975
——Bonus for increasing coal economy, 694
——Bunkers, Protection of, 141
——Check valve used to protect a steam gage, *416
——Chemical laboratory of United Electric Light & Power Co., *1259
——Cleaning, Removing dust caused by, *27
——Coal, pulverized, as a fuel, 843
——Concrete floors, Laying dust on, 192
——Converting two-phase system to three-phase, Richmond Light & R. R. Co., *86
——Cost of operating power plants. By A. Schwaiger, (D.) 542
——Diesel engine performance at Hutchison, Minn., *1029
——Distribution, Inexpensive arrangements for reaching small loads, *530
——Drains for manholes, *304
——Drips, Disposal of high and low-pressure steam condensate, *301
——Emergency service in forty-five minutes, 1392
——Engines, Eliminating excuses for runaways, 730
——Erie flood. Destruction wrought by, *489
——Expense of operating Massachusetts steam station, 302
——Generating cost data, 330
——Ice formation on intake screens, Special gates to prevent, *1030
——Indicator cards, Endless-tape, *90
——Instructing employees in technical subject, Boston Edison Co., 291
——Intake screens, Handling, Salem (Mass.) Elec. Ltg. Co., *189
——Jumpers prevent service interruptions, *590
——Load dispatching at Boston and in New Jersey, 904
——Load factors, Increasing, 1121
——Load factors, output and cost of central stations, (D.) *20
Central station operation: (Continued)
——Loads, Handling summer and winter, *1082
——Loss of energy between busbars and consumer, Advisability of ascertaining, 729
——Methods, Rapid advance in. A. I. E. E. address, P. M. Lincoln, 6

Incandescent lamps:
——Artificial daylight in practice. By M. Luckiesh, *71
——For bicycles, Usona Mfg. Co., *769
——Cadmium-Vapor, (D.) 876
——Development of, 955
——Elevator threshold (See Elevator door switch), *1386
——Filament size and intensity of projected beam, 177
——Filament temperature, M. Pirani and A. R. Mayer, (D.) 876, (D.) 1438
——Gas-filled:
Desirable features of fixtures, 409
Development at home and abroad, 331
50-watt, Westinghouse Lamp Co., *34
40 and 60-watt, Lux Mfg. Co., *995
Germany, (D.) 410
Great Britain, (D.) 250
New sizes available, 250
Review of developments. By M. Pirani and A. R. Meyer, 1268
Vs. the arc lamp in street lighting, 57
Nitrogen-filled lamps in Boston Art Museum, *481
Nitrogen-filled tungsten, *708
——For horse-drawn vehicles, Rose Mfg. Co., *768
——Life-testing equipment for tungsten lamps, *12
——Melting point of tungsten, (D.) 464
——Metallic filaments, Shaping, (D.) 298
——Negative thermionic currents from tungsten. By K. K. Smith, (D.) 186
——Nitrogen-filled (See also gas-filled)
——Non-glare, swivel-bulb type for automobiles, A. Hall Berry, *1222
——Rating. By J. Epstein, (D.) 935
Incandescent lamps: (Continued)
——Rating and designation. By R. Nanjoks, (D.) 708
——Rating in Germany, (D.) 598
——Rating of, discussion on Solomon's paper, (D.) 19
——Renewal policy of Edison companies, 1303
——Sales for thirty-five years, *861
——Shaving-mirror type, Federal Sign System (electric), *1275
——Teddy bears' eyes, Interstate Electric Novelty Co., *1216
——Testing instruments, Eldredge Elec. Mfg. Co., *423
——Testing, Cleveland Laboratory, 1
——Tungsten, ductile, (D.) 1325
——Tungsten filaments, (D.) 185
——Tungsten-lamp prices for New York, 1053
——Tungsten-lamp shunt for preventing arcing at contacts, *1435
——Vacuum-tungsten type. By J. F. Skogland, (D.) 1326
Incandescent lamp fixtures:
——Arc-lamp cases converted for gas-filled lamps, *705
——Brackets, Adjustable, Newman Mfg. Co., *604
——Combined dimming socket and shade holder, Wirt Co., *549
——Demonstration stand, *713
——Diffusing globe and shade, John D. Raymond, *211
——Drop lighting fixtures for garage service, 482
——For gas-filled lamps, glass bowls and globes, Macbeth-Evans Glass Co., *1221
——Gas-filled-lamp, ventilated fixture, Pittsburgh Metal Spinning & Stamping Co., *486
——Glass for producing daylight conditions, *100
——Guard, hinged with lock, Flexible Steel Lacing Co., *768
——Indirect and semi-indirect fixtures with cone-shaped diffuser, Mohrlite Co., *1218
——Indirect lighting receptacles, Luminous Unit Co., *659
——Lamp grips, Bryant Electric Co., *885
——Locking spring shade holder, Harvey Hubbell, Inc., *659
——Low-ceilinged-house type, *208
——Nitrogen-filled-lamp type, F. W. Wakefield Brass Co., *941
——Portable adjustable fixture, Rose-Strauss Co., *33
——Reflector, Harvey Hubbell, Inc., *486
——Reflectors, Elliptical angle, Benjamin Electric Mfg. Co., *1046
——Reflectors for flood lighting, National X-ray Reflector Co., *825
——Reflectors for gas-filled lamps, National X-ray Reflector Co., 1047
——Reflectors for nitrogen-lamp window lighting, National X-ray Reflector Co., *212
——Reflectors, Steel bowl-type, Harvey Hubbell, Inc., *768
——Semi-indirect units for use with ordinary shade holders, Simplexlite Co., *1220
——Semi-indirect ventilated, Cleveland Chandelier Co., *606
——Series street-lighting tungsten-lamp type, General Electric Co., *1161
——Shade holder and angle socket, Benjamin Electric Mfg. Co., *713
——Silk shades with mica centering disks, Storrs Mica Co., *656
——Socket covers and shade holders, Plume & Atwood Mfg. Co., *35
——Socket, Porcelain, Arrow Elec. Co., *212
——Stand, Wooden, Crucet Mfg. Co., *769
——Table, desk and bed types, Faries Manufacturing Company, *1444
Indiana Electric Light Association:
——Convention, *566, 626
Indicators, electrostatic potential and synchronism, G. E. Co., *310
Inductance:
——Coils, Curves for designing. By Philip R. Coursey, (D.) 765
——Electromagnetic. By G. W. O. Howe, (D.) 1210
——Of concentric flat rings. By H. Chireix, (D.) 709
——Measurements of. By F. Wenner, E. Weibel and F. F. Silsbee, (D.) 1269
Inductances, Mutual. By Geo. A. Campbell, (D.) 139
Induction:
——Laws of, 282, (D.) 250. By David Robertson, (D.) 186, (D.) 466. By A. E. Clayton, (D.) *652. By Carl Hering, (D.) 709. By A. Blondel, (D.) 20
Induction coils. By E. Raverot, (D.) 139
Industrial Electric Heating Association, Detroit convention, *1278
Industrial revolution, 561
Industrial applications:
——Road building with electric power, *1201
——Sewer digging and excavation pumping with electricity. By Bayard W. Mendenhall, *1319
Industrial plants:
——American Mfg. Co., plant problems solved by purchased service, *628
——Apparel factories, Electric irons effect better working conditions, *984
——Bakery, Equipment and energy consumption, *981
